SERVICES & SOLUTIONS

DESIGN & ENGINEERING SERVICES

Our design and engineering services connect clients with the insights and technology capabilities that help transform their business.

We help clients by understanding their business goals, assessing their challenges, and formulating solutions that are relevant to their business.

Our design specialists engineer solutions with expertly prepared documentation for successful implementation.

TECHNOLOGY INTEGRATION & SUPPORT SERVICES

Clients appreciate the ability to access our unique teams of subject matter experts; partnering with them in the design, development & implementation of powerful technology solutions.

Design Based on thorough technical analysis, our engineering teams design comprehensive solutions that deliver exceptional performance and ease-of-use to enhance client productivity.

Build We combine disciplined management and effective communications to collaborate with clients, architects and construction contractors to exceed client expectations and surpass industry standards.

Manage Our global services ensure the stability, longevity and increased adoption of technology systems. Our 24/7/365 help desk, flexible options and nationwide coverage help clients meet all performance requirements.

MANAGED SERVICES

Diversified managed services provide remote, hybrid and on-site support options, allowing clients to create the exact coverage they need to support their business requirements.

Remote Monitoring Delivering robust support with up-to-the-minute tracking and management of system health, connectivity, location, contact information, service history, special needs and requirements.

On-Site Support Staff augmentation resources located on-site to provide clients with a range of customizable services from meeting support to training and pre-emptive maintenance.

Asset Management Asset and configuration management of everything from client databases to spare inventory and end-of-life technologies.

CAPABILITIES

INDUSTRIES SERVED

Advertising & retail, data centers, education, enterprise, financial services, government, healthcare, hospitality, media & entertainment, museums & exhibits, non-profits, sports & live events, transportation, and utilities.

CERTIFICATIONS

Our service offerings are based on the highest technology credentials, backed by world-class project management skills and fueled by a passion for helping clients.
