## State-of-the-Art Sound and Visual Systems for a World-Class Sports Venue

The Australian Institute of Sport (AIS) has served as a training ground for Olympic and Paralympic champions and elite athletes since 1981. The AIS' goal was to create a dynamic, multi-use space capable of hosting elite sports, concerts and events, replacing and updating their 30 year old systems.

### WHAT WE DELIVERED

- Replaced outdated audio with precision sound engineering, energising crowds with crystal-clear acoustics installed across the ceiling grid.
- Installed vibrant, large-scale displays and timing control for dynamic visuals, replacing legacy scoreboards.
- Streamlined venue-wide communication with a new digital signage system, providing real-time updates across 29 endpoints.

### IMPACT

With high quality sound and visual systems, from time tracking to wayfinding, Diversified has worked with AIS to create an immersive and engaging experience for both athletes and audiences. Solutions provided for AIS have allowed it to become Canberra's premier indoor entertainment venue, with state of the art technology fit for the world class athletes who train there.

*"Working with Diversified has been a phenomenal customer experience from our end. We are extremely happy with the service and output they have provided."*

*The feedback that we've received from athletes and entertainers that have used this space has been very complimentary of the lighting and visual enhancements that have been installed into the arena."*

- **Michael Singh** (Project Manager, Australian Sports Commission)
