Lumens of  
Projection

What began in 2003 as a small group of 16 is now a multi-campus movement serving 11,000 weekly. To meet demand, Journey Church secured a new West Palm Beach facility, adding 1,200 seats. Partnering with Diversified, they transformed it into a broadcast-ready, concert-level worship venue—delivered under an aggressive timeline without missing a single Sunday.

## WHAT WE DELIVERED

- Loudspeakers, advanced mixing, and broadcast suite for clear, consistent sound.
- Multi-camera system with switching for IMAG, streaming, and multi-campus.
- Stage and house lighting for flexible atmospheres.
- LED wall with laser projection screens.
- Enterprise-grade backbone and fiber.
- Integrated wired/wireless platform for team coordination.

## IMPACT

The launch of Journey Church West Palm Beach marked a new era of growth. Attendance surged as guests praised the immersive experience as “a whole new level.” More than solving capacity, the project elevated production standards and expanded the church’s mission, with broadcast systems now reaching thousands weekly and the venue confidently hosting worship nights, Sundays, and special events.
