

Innovation That Leads to Transformation

Modern Worship Redefined Through
Design, Excellence, and Innovation

Industry: **Faith**

Location: **Tulsa, Oklahoma, U.S.**

Transformation Church set out to rethink what ministry could look like in a digital age. Led by Pastor Michael Todd, the team believed technology was key to reaching people in new ways. Their goal was to create a space where faith and innovation work hand in hand, building a foundation for a global ministry that connects far beyond the church walls.

WHAT WE DELIVERED

- One of the first UHD HDR broadcast systems for house of worship in the world
- Media-grade routing, cameras, and workflows for live and digital content
- Immersive object-based audio with synchronized IP backbone
- Intelligent lighting integrated with cinematic video
- Campus-wide communications, signage, and content network for multi-platform ministry

IMPACT

Transformation Church has become a global voice and content hub, creating and sharing worship, music, and teaching that reach millions each week. With technology at its core, every system works together to deliver cinematic quality and genuine connection turning technology into ministry and building a bridge that brings people closer to God, wherever they are.
