

Powering Real-Time Financial Decisions

Next-Gen AV Infrastructure Enables Seamless, High-Stakes Global Collaboration

Client: **Global Financial Institution**

Industry: **Financial Services**

Location: **Major US Financial District**

A global financial institution set out to create a next-generation headquarters designed to support high-stakes collaboration, executive communications, and enterprise-wide decision making. The organization needed a flexible, future-ready technology environment capable of supporting thousands of employees while delivering seamless experiences across meeting spaces, operational environments, and large-scale communications.

WHAT WE DELIVERED

- Enterprise-wide SMPTE ST 2110 AV-over-IP network for scalable, broadcast-grade communications
- Flexible conference and collaboration spaces built for evolving workplace needs
- Large-scale video wall and immersive presentation environments
- Centralized control and broadcast operations across the facility
- Customized executive and high-security AV environments designed for reliability and ease of use

IMPACT

The new headquarters delivers a scalable, high-performance collaboration ecosystem built for mission-critical communications. Executive meetings, enterprise broadcasts, and global communications can operate simultaneously with reliability and consistency. Centralized management and network-centric architecture simplify operations while creating seamless user experiences that support productivity, flexibility, and future growth.
