

Immersive Training, Reimagined

Delivering a High-Performance Hybrid Learning Environment

Client: **Leading Talent Solutions Firm**

Industry: **Staffing & Recruiting**

Location: **Southeast, US**

A leading talent solutions firm expanded its Southeast footprint with a dedicated corporate training center to support daily sales, leadership and HR programs for a rapidly growing workforce. They wanted to create a consistent, high-quality hybrid experience that would equally engage in-room and remote participants. The environment needed to create visual impact and establish a scalable technology standard capable of supporting continuous training.

WHAT WE DELIVERED

- Divisible training rooms with immersive direct-view LED displays to enhance visibility and content clarity
- AI-assisted presenter tracking that automatically frames instructors as they move
- Standardized collaboration technology deployed across training rooms, conference spaces, and hoteling areas
- Unique, immersive round environment for dynamic, high-impact sessions
- Integrated room scheduling, digital signage, and facility-wide background audio

IMPACT

The new training center delivers scalable, high-impact learning with technology designed around how people naturally work. Across 50+ standardized spaces, it improves consistency, simplifies support and boosts efficiency. By removing technical barriers, it empowers users to collaborate and lead effectively, creating a reliable, future-ready environment that enhances engagement and drives stronger business outcomes.
